

DIAS — Germany's AI dialect-identification system for asylum origin assessment

AI in the Public Sector · Good practice · Alemania

Puntuación de calidad: 53/100

Solidez de la evidencia: Moderada

Resumen

BAMF deploys AI dialect analysis (DIAS) in German asylum procedures since 2017 to assess applicants' country of origin from speech recordings. Used in 43,593 of 334,000 cases in 2023; error rates of 13–27% and undisclosed influence on decisions raise serious accountability concern

Dimensiones clave

Dimensión	Puntuación
Evidence of impact / measured public value	2/3
Transparency, fairness & accountability	1/3
Transferability / demonstrated replication	2/3
Scalability beyond pilot	2/3
Governance, capability & sustainability	1/3
