Educate Girls — Machine-Learning Village Targeting and a Development Impact Bond for Out-of-School Girls in Rajasthan, India

AI in Education · Good practice · India

Quality score: 73/100

Evidence strength: Strong

Summary

Educate Girls paired an outcomes-based Development Impact Bond (2015–2018, Bhilwara) with IDinsight's machine-learning model of where out-of-school girls live; a village-level RCT found +0.31 SD learning gains and 92% of eligible girls enrolled.
