

New Førde Hospital: Measures for flood protection

PES & Nature-Based Solutions · Buena práctica · Noruega

Evaluación de C-NAPSE pendiente

Solidez de la evidencia: Observacional / pre-post

Resumen

Førde Central Hospital is highly exposed to flooding. This is due to its riverside location and the increasing likelihood of intense rainfall and rapid snowmelt under a changing climate. Although a 2014 flood caused damage, regulations only required flood protection for newly con
