

AI-Assisted Data Cleansing — Jordan Restores 2 Million Tawjihi Exam Records and Harmonises 2.5 Million Land Records

AI in the Public Sector · Good practice · Jordan

Quality score: 53/100

Evidence strength: Descriptive / self-reported

Summary

Jordan's Digital Economy Ministry, with Japan's JICA and Amman-based Eqra Tech, used AI to repair national-ID links on 2M+ 1985–2004 exam records and reconcile 2.5M land records across two ministries — a data-quality fix under Jordan's 2023–2027 AI strategy.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	2/3
Transparency, fairness & accountability	1/3
Transferability / demonstrated replication	1/3
Scalability beyond pilot	2/3
Governance, capability & sustainability	2/3
