

AI-Assisted OCR Grading Pilot for Vietnam's Restructured 2025 National High School Graduation Exam

AI in Education · Good practice · Vietnam

Quality score: 40/100

Evidence strength: Moderate

Summary

Researchers in Vietnam piloted an AI/OCR grading tool for the restructured national high-school exam, hitting 98.5% handwriting-recognition accuracy on 93 papers — an early, unscaled step toward automating grading for an exam now sat by 1.2m+ students.

Key dimensions

Dimension	Score
