

Anoppi — Finland's AI Tool for Anonymising Court and Authority Decisions Before Publication

AI in the Public Sector · Good practice · Finland

Quality score: 60/100

Evidence strength: Moderate

Summary

Finland's Ministry of Justice, with the University of Helsinki, Aalto University and Statistics Finland, built Anoppi — an open-source tool that automatically pseudonymises names and personal data in court and authority decisions before they are published as open data.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	1/3
Transparency, fairness & accountability	3/3
Transferability / demonstrated replication	2/3
