

Bono por Hijo — Chile's Per-Child Pension Supplement for Women

Gender Equality · Good practice · Chile

Quality score: 74/100

Evidence strength: Strong

Summary

Since 2008, Chile has paid women a per-child pension top-up at 65, reaching 360,000 women by October 2020 with an average boost of about US\$12.70/month — wide-reaching, but researchers judge it too small to close the underlying gender pension gap.
