

data.europa.eu's eTranslation — Automated Neural Machine Translation of Open-Data Metadata Across 24 EU Languages

AI in the Public Sector · Good practice · Luxembourg

Quality score: 87/100

Evidence strength: Strong

Summary

The EU's open-data portal auto-translates harvested dataset metadata into all 24 official EU languages via the Commission's eTranslation engine — fully automated, covering 1.6M+ datasets from 178 catalogues — though the portal warns translations may be imperfect.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	2/3
Transparency, fairness & accountability	2/3
Transferability / demonstrated replication	3/3
Scalability beyond pilot	3/3
Governance, capability & sustainability	3/3
