

data.norge.no AI Search — Norway's Natural-Language Discovery Layer for the National Data Catalogue

AI in the Public Sector · Good practice · Norway

Quality score: 53/100

Evidence strength: Descriptive / self-reported

Summary

Norway's national open-data catalogue, data.norge.no (run by Digdir), added an AI-powered natural-language search built on Google Vertex AI, letting users ask questions like 'Which areas in Norway are protected?' instead of guessing exact dataset titles or technical terms.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	1/3
Transparency, fairness & accountability	2/3
Transferability / demonstrated replication	1/3
Scalability beyond pilot	2/3
Governance, capability & sustainability	2/3

Evaluated by C-NAPSE
