

Digital Inclusion Barometer — Belgium's King Baudouin Foundation Tracks Digital Vulnerability Across Editions

Digital Inclusion · Good practice · Belgium

Quality score: 88/100

Evidence strength: Strong

Summary

Belgium's Digital Inclusion Barometer analyses Statbel's national ICT household survey (ages 16–74) to track digital vulnerability: 46% in the 2022 edition (2021 data), 40% in 2024 (2023 data). It measures the problem, not interventions.

Key dimensions

Dimension	Score
Innovation level	2/5
Sustainability (ongoing)	1/1
