

EMAP — Engaging Men Through Accountable Practice, Eastern DRC

Gender Equality · Good practice · Congo (the Democratic Republic of the)

Quality score: 37/100

Evidence strength: Cautionary / limited

Summary

A 16-week men-only discussion-group programme run by the International Rescue Committee in North and South Kivu, DRC. A cluster-randomised trial across 28 communities found large shifts in men's gender attitudes but no significant reduction in women-reported partner violence.
