

ESCORT — Latvia's State Revenue Service ML risk-scoring system for tax compliance

AI in the Public Sector · Good practice · Latvia

Quality score: 80/100

Evidence strength: Observational / pre–post

Summary

Latvia's SRS uses ESCORT ML to score every registered company for fraud risk across tax and labour domains. Fraud detection time cut from ~1 month to minutes; analytical reports from 4 weeks to 1 day; public rating system live since Feb 2024.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	2/3
Transparency, fairness & accountability	2/3
Transferability / demonstrated replication	2/3
Scalability beyond pilot	3/3
Governance, capability & sustainability	3/3
