

Evaluating the effectiveness of the Dutch National Heatwave Plan

PES & Nature-Based Solutions · Good practice · Netherlands

Pending C-NAPSE evaluation

Evidence strength: Observational / pre–post

Summary

Across Europe, Heat Health Action Plans (HHAPs) play a critical role in coordinating the public health response during periods of extreme heat. However, there is limited evidence on the effectiveness of measures identified in HHAPs in reducing mortality and morbidity (EEA, 2024).
