

FFG Monitoringstelle des Bundes — Austria's Multi-Year Digital Accessibility Monitoring with Disability-Led Testing

Digital Inclusion · Good practice · Austria

Quality score: 92/100

Evidence strength: Strong

Summary

Austria's federal monitoring body cut the share of public websites failing over half of WCAG criteria from 51% (2020/21) to 9% (2024) — while reporting honestly that not one audited site was ever fully conformant. Disability organisations help select and test the sample.

Key dimensions

Dimension	Score
Innovation level	3/5
Sustainability (ongoing)	1/1
Evaluation evidence	1/1
Demonstrated reach	1/1
Documented learning	1/1
