

FRAIA — the Netherlands' Fundamental Rights and Algorithms Impact Assessment, Piloted Across 15 Government Algorithms

AI in the Public Sector · Good practice · Netherlands

Quality score: 87/100

Evidence strength: Descriptive / self-reported

Summary

The Netherlands piloted its Fundamental Rights and Algorithms Impact Assessment on 15 government algorithms in 2023-24, testing whether agencies can systematically check AI systems for rights risk before deployment; MPs have since backed making it mandatory.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	2/3
Transparency, fairness & accountability	3/3
Transferability / demonstrated replication	3/3
Scalability beyond pilot	2/3
Governance, capability & sustainability	3/3
