

France Travail's 'Ciblage du Contrôle' — an AI Tool Sorting Job Seekers into 'Suspect' and 'Non-Suspect' for Control Priority

AI in the Public Sector · Good practice · France

Quality score: 33/100

Evidence strength: Descriptive / self-reported

Summary

France Travail built an AI tool, trained on 60,000 cases across 26 variables, to classify job seekers as 'suspect' or 'non-suspect' for control priority, as controls scale toward 1.5 million by 2027. It has refused to release the source code, drawing opacity criticism.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	1/3
Transparency, fairness & accountability	0/3
Transferability / demonstrated replication	1/3
Scalability beyond pilot	2/3
Governance, capability & sustainability	1/3
