

France Travail's Job-Search Control Targeting Model — 26 Variables, 7,000-File Pilots and an Unpublished Evaluation

AI in the Public Sector · Good practice · France

Quality score: 33/100

Evidence strength: Cautionary / limited

Summary

France Travail is piloting a 26-variable decision-tree model trained on ~60,000 past checks to select jobseekers' files for control; 79% overlap with past choices, no published fairness or outcome evaluation.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	1/3
Transparency, fairness & accountability	0/3
Transferability / demonstrated replication	1/3
Scalability beyond pilot	2/3
Governance, capability & sustainability	1/3
