

GrenadaInfoSAFE: A National Gender-Based Violence Data System

Gender Equality · Good practice · Grenada

Quality score: 52/100

Evidence strength: Moderate

Summary

Under the EU-UN Spotlight Initiative, Grenada built GrenadaInfoSAFE, a digital system linking police, health, gender-affairs and statistics agencies to replace paper-based GBV reporting, responding to a 2018 survey finding 29% of women faced intimate-partner violence.

Key dimensions

Dimension	Score
