

# Ille-et-Vilaine's Inventory of Algorithmic Treatments — a French Département Publishes 91 Algorithms, Without Source Code

AI in the Public Sector · Good practice · France

Quality score: 40/100

Evidence strength: Moderate

## Summary

In May 2024 the Ille-et-Vilaine departmental council published an open-data inventory of 91 algorithms, each with a sheet on legal basis, data and impact. No source code is published and no sanction attaches to non-compliance.

## Key dimensions

| Dimension                                  | Score |
|--------------------------------------------|-------|
| Evidence of impact / measured public value | 1/3   |
| Transparency, fairness & accountability    | 2/3   |
| Transferability / demonstrated replication | 1/3   |
| Scalability beyond pilot                   | 1/3   |
| Governance, capability & sustainability    | 1/3   |
