Inclusive Design Toolkit Exclusion Calculator — Cambridge's Free Tool Estimating How Many People a Product Design Excludes

Digital Inclusion · Good practice · United Kingdom

Quality score: 52/100

Evidence strength: Moderate

Summary

A free Cambridge tool where designers rate the capability demands a product places on users (vision, hearing, dexterity and more) and get an estimate of the share of the UK population excluded. Its data are UK-only and dated.

Key dimensions

Dimension	Score
Innovation level	3/5
Sustainability (ongoing)	1/1
Evaluation evidence	0/1
Demonstrated reach	0/1
Documented learning	1/1
