

Israel's Standard IS 5568 — Binding Digital Accessibility Law with No-Fault Enforcement

Digital Inclusion · Good practice · Israel

Quality score: 48/100

Evidence strength: Moderate

Summary

Israel's binding IS 5568 standard requires nearly all public and private websites and apps to meet WCAG 2.0 AA, enforced via administrative fines and no-fault damages lawsuits — one of the world's most strictly enforced digital accessibility regimes.

Key dimensions

Dimension	Score
Innovation level	2/5
Sustainability (ongoing)	1/1
Evaluation evidence	0/1
Demonstrated reach	1/1
