

Jangat — Senegal's LLM-Powered Tool Let 19,000 Voters Compare Presidential Candidates' Programmes

AI in the Public Sector · Good practice · Senegal

Quality score: 33/100

Evidence strength: Descriptive / self-reported

Summary

A four-engineer Senegalese team built Jangat, an LLM-based app letting voters search and compare all 20 candidates' programmes by topic; it drew 11,000 connections in its first week and 19,000 in the campaign's final ten days before the March 2024 election.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	1/3
Transparency, fairness & accountability	1/3
Transferability / demonstrated replication	1/3
Scalability beyond pilot	1/3
Governance, capability & sustainability	1/3
