KRDS — Korea's Government-Wide UI/UX Design System for Accessible Public Websites and Apps, Still Without Published Outcome Data

Digital Inclusion · Good practice · South Korea

Quality score: 52/100

Evidence strength: Moderate

Summary

MOIS and NIA run KRDS, a shared library of 43 components and 16 patterns for public websites, with an accessibility guide based on WCAG AA. A 2025 upgrade adds mobile and elderly-friendly components, but no adoption counts or user outcomes have been published.

Key dimensions

Dimension	Score
Innovation level	3/5
Sustainability (ongoing)	1/1
Evaluation evidence	0/1
Demonstrated reach	0/1
Documented learning	1/1
