

Living Water Garden — Chengdu's Park-Scale Constructed Wetland Teaching River Clean-Up (China)

PES & Nature-Based Solutions · Good practice · China

Quality score: 13/100

Evidence strength: Cautionary / limited

Summary

A 2.4 ha park on Chengdu's Funan River passes 200 m³ of polluted river water a day through ponds and plant beds; its own operators say the volume is too small to change river quality.

Key dimensions

Dimension	Score
Carbon — sequestration / storage, evidenced	0/3
Biodiversity — conservation / improvement, evidenced	0/3
Water & soil — retention, infiltration, erosion control	1/3
Fire resilience — risk reduction, evidenced	0/3
Governance, certification & transferability	1/3
