

Male Norms Initiative — Group Education & Community Engagement for Men, Addis Ababa

Gender Equality · Good practice · Ethiopia

Quality score: 74/100

Evidence strength: Strong

Summary

A quasi-experimental group-education and community-engagement programme for young men in three low-income subcities of Addis Ababa cut self-reported past-6-month IPV perpetration from 53% to 38% among 809 participants, with matched gains in support for gender-equitable norms.
