

MIRA — Albania's AI Risk-Assessment System for Labour Inspection Targeting

AI in the Public Sector · Good practice · Albania

Quality score: 73/100

Evidence strength: Descriptive / self-reported

Summary

Albania's labour inspectorate replaced its manual 'Matrix of Penalties' with MIRA, a nine-algorithm ML risk tool that now drives 70% of its 12,000+ annual inspections, showing a 30% gain in predicting undeclared work, per ILO/EU reporting and independent Albanian press.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	3/3
Transparency, fairness & accountability	1/3
Transferability / demonstrated replication	2/3
