

Pastoral Nomads take Climate Action — Mongolia Rangeland Plan Vivo Project

PES & Nature-Based Solutions · Good practice · Mongolia

Quality score: 60/100

Evidence strength: Observational / pre–post

Summary

Plan Vivo-certified rangeland carbon project in central Mongolia; 100+ herder households across 70,000 ha practice sustainable rotational grazing, yielding 24,850 tCO₂ independently verified in 2023.

Key dimensions

Dimension	Score
Carbon — sequestration / storage, evidenced	3/3
Biodiversity — conservation / improvement, evidenced	1/3
Water & soil — retention, infiltration, erosion control	2/3
Fire resilience — risk reduction, evidenced	1/3
Governance, certification & transferability	2/3
