

Piloting Gender-Responsive Budgeting in Montenegro's Agriculture Sector

Gender Equality · Good practice · Montenegro

Quality score: 37/100

Evidence strength: Cautionary / limited

Summary

Prompted by data showing 65% of Montenegro's rural women work on farms but only 13% own land, the government piloted gender-responsive budgeting in the agriculture ministry's budget cycle from 2019 — one strand of a still partial, unevenly monitored national GRB effort.

Key dimensions

Dimension	Score
Transferability / replicability	1/3
