

PIRL — Participatory Digital Storytelling for Disability-Inclusive Research

Digital Inclusion · Good practice · Cameroon

Quality score: 52/100

Evidence strength: Moderate

Summary

A Cameroon/Sierra Leone-based academic network had people with and without disabilities co-produce six short digital stories on disability-inclusive research, published as a peer-reviewed case study — a small, rigorously documented pilot rather than a proven at-scale programme.

Key dimensions

Dimension	Score
Innovation level	3/5
Sustainability (ongoing)	0/1
Evaluation evidence	1/1
Demonstrated reach	0/1
Documented learning	1/1
