

StorSak — the Norwegian Storting's AI-Assisted Digital Value Chain for Parliamentary Case Files

AI in the Public Sector · Good practice · Norway

Quality score: 47/100

Evidence strength: Moderate

Summary

Since 2019 Norway's Storting has built StorSak, a digital value-chain replacing paper case handling; in 2025 it began piloting a machine-learning module that auto-tags parliamentary cases and documents by subject to decide what must be archived.

Key dimensions

Dimension	Score
Evidence of impact / measured public value	1/3
Transparency, fairness & accountability	2/3
Transferability / demonstrated replication	1/3
Scalability beyond pilot	1/3
Governance, capability & sustainability	2/3
