Suomi.fi Design System — Finland's Open, WCAG-Tested Component Library for Public Digital Services, With Self-Declared Rather Than Independently Evaluated Accessibility

Digital Inclusion · Good practice · Finland

Quality score: 48/100

Evidence strength: Moderate

Summary

Finland's DVV maintains the Suomi.fi Design System, an MIT-licensed React component library that it says is built and tested against WCAG 2.2 A/AA and checked with VoiceOver, NVDA and TalkBack. No independent evaluation of its effect on users has been published.

Key dimensions
