

Tristao Islands Mangrove Restoration — 1,400 Hectares Replanted in Guinea's Ramsar Wetland (2019-2022)

PES & Nature-Based Solutions · Good practice · Guinea

Quality score: 60/100

Evidence strength: Moderate

Summary

Guinee Ecologie and partners restored more than 1,400 hectares of mangrove across Guinea's Tristao Islands Ramsar site (2019-2022), against roughly 7,000 hectares lost 2010-2015, in habitat hosting 200+ bird species and nesting sea turtles.

Key dimensions

Dimension	Score
Carbon — sequestration / storage, evidenced	2/3
Biodiversity — conservation / improvement, evidenced	3/3
Water & soil — retention, infiltration, erosion control	2/3
Fire resilience — risk reduction, evidenced	0/3
Governance, certification & transferability	2/3
